University of
Bethune
Toronto Canada 

Transdisciplinary training
in bacterial and viral resistance

We have developed a transdisciplinary training program to study fundamental, clinical, epidemiological and social aspects of resistance of bacteria, viruses, and parasites to antimicrobial agents. Scholarships for graduate (M.S. and Ph.D.) and postdoctoral training are available.

MENTORS:

John Atkinson	Walter Levesque
Karen Brockman	Harold Ohland
Alan Feldman	Barbara Stein
Dwight Heckenzimmer	Alvin Stohl
Sarah Langeville	Tommy Tucker

The Department is one of the fastest growing in research activity in the new university sector and successful candidates will join a team of highly active researchers with a diverse research portfolio.

Candidates will have an excellent track record in research and will initially be given a light teaching load to help them develop their research careers.
